

Packaging machines for dry ice pellets: Your individual all-in-one solution

We offer a wide range of **modular packaging machines for dry ice pellets**. Each machine can be adapted individually to your specific requirements.

Our portfolio goes from semi-manual systems to fully automated production halls offering packaging units from 500 g to 10 kg (1.1 to 22 lb). We provide a one-stop service from a single source **tailored to your individual needs and conditions on site**. Our pellet packaging machines ensure economical and efficient production processes and avoid any contact with dry ice. This **guarantees food grade dry ice** according to the HACCP principles as well as **highest safety standards** for your staff. We show you the **easiest way to handle dry ice pellets** quickly and safely.

What individual packaging solution can we offer to you?

Challenge us and contact us today. We have the key to your success.
